This survey was conducted from September 19 - 21, 2022 and included a pool of 500 likely voters in Oklahoma. These survey results were weighted based on party affiliation, age, gender, and level of education based on Amber Integrated's proprietarty 2022 voter turnout modeling. This survey has a margin of error of 4.4% at a 95% confidence interval. It is important to remember that subsets based on party affiliation, gender, age, education, race/ethnicity, and location carry with them higher margins of error, as the sample size is reduced. The poll surveyed both cell phones and landlines and used a combination of live callers and an online sample of likely voters.

This survey was conducted from September 19 - 21, 2022 and included a pool of 500 likely voters in Oklahoma. These survey results were weighted based on party affiliation, age, gender, and level of education based on Amber Integrated's proprietarty 2022 voter turnout modeling. This survey has a margin of error of 4.4% at a 95% confidence interval. It is important to remember that subsets based on party affiliation, gender, age, education, race/ethnicity, and location carry with them higher margins of error, as the sample size is reduced. The poll surveyed both cell phones and landlines and used a combination of live callers and an online sample of likely voters.

	Total	Republican	Democrat	Independent	Libertarian	Female	Male	18-29	30-39	40-49	50-59	69-09	70 or older	Completed high school or less	Some college but did not finish	4 year college degree	Graduate degree	Black	White	Hispanic or Latino	Asian	Native American	Other	Prefer not to say	Oklahoma City	Tulsa	Other
