

# MSHSAA Returning to Play Post COVID-19 Infection

**\*\*Adapted from the American Heart Association Pre-Screening of Competitive Athlete Recommendations<sup>2</sup>**

- Chest pain/tightness with exercise
- Syncope/near syncope that is unexplained
- Unexplained or excessive dyspnea/fatigue with exertion
- New Palpitations
- Heart murmur on exam

Medical providers should take into consideration the intensity level of sport participation and exercise to help guide their decision to pursue additional evaluation.
