

Vaccine & Immunization Network Interface (VINI)

How to Register for a COVID-19 Vaccine with a Household Member

This Tip Sheet is to help New Hampshire residents schedule COVID-19 vaccine appointments for themselves and a family member in the New Hampshire Vaccine & Immunization Network Interface (VINI).

Can I bring a household member to my appointment?

You are allowed to bring one (1) household member to your appointment *if they are also eligible in any of the open phases*. After registering and activating your account, register your household member by clicking the **Add a Family Member** tile in VINI. After registering your household member, they can accompany you to your appointment without scheduling a separate appointment.

Please Note: If you register your household member through this process, all communications will be sent to the email address that registered the account in VINI. If your household member prefers to manage their own COVID-19 vaccine appointment and receive direct communications, please instruct them to independently complete the screening and registration process using an email address different from the one already used.

How do I add a household member to my account?

- Click **Add a Family Member** on the VINI **Home** page and then click **Add Family Member**.
- You will be brought through the screening and registration process for your household member.
 - If you are registering for a household member, you will have to answer questions about their medical history and certain allergies that would interfere with vaccination. Review the CDC's "[What's in Vaccines](#)" to understand if your household member might be allergic to any ingredients in the COVID-19 vaccines.

- Once both household members are registered, proceed to **Create/Manage Appointment** on VINI'S homepage and follow the steps to schedule your COVID-19 vaccine appointment. The appointment you schedule will be for both you and your household member.

What to remember about your household member's appointment:

Once you have completed your registration and added an eligible family member, your family member is tied to your appointment. Their vaccination appointment is now linked with yours and will change if/when your appointment changes or if you choose to cancel your appointment.

Congratulations – you have booked COVID-19 vaccine appointment for you and a household member!

If you have any questions throughout this process, please dial 2-1-1 for support.
