

Today Republican members of the Jefferson County delegation to the Kentucky General Assembly called for the resignation of Dr. John Marshall. Where were they last week when racist text was sent to African Americans in Louisville? Where were they when the US Department of Justice issued a scathing indictment of LMPD and the City of Louisville? Where were they when a member of their delegation made the ridiculous statement that her father was a slave? Where were they when Donald Trump made disparaging statements about predominately African American cities?

This is the first time that I am aware of that this group of legislators have ever spoken as a group on any matter regarding race or human relations. I believe they are appealing to their political base and laying the groundwork for splitting the Jefferson County School District.
