DURHAM, NH - New Hampshire Governor Chris Sununu is currently the strongest Republican challenger to incumbent Maggie Hassan for U.S. Senate in 2022. Sununu and Hassan are tied in a hypothetical matchup and former Senator Kelly Ayotte is also statistically tied with Hassan. Retired General Don Bolduc and political commentator Corey Lewandowski trail Hassan by double-digit margins. Sununu continues to enjoy high favorability ratings in the state, while Granite Staters are divided in their view of Hassan. Residents are also divided on Ayotte, Bolduc is largely unknown, and Lewandowski is largely unpopular in the state.

These findings are based on the latest **Granite State Poll***, conducted by the University of New Hampshire Survey Center. One thousand eight hundred and sixty-one (1,861) Granite State Panel members completed the survey online between February 18 and February 22, 2021. The margin of sampling error for the survey is +/- 2.3 percent. Included were 1,676 likely 2022 general election voters (MSE = +/- 2.4%). Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and 2020 election results in NH. Granite State Panel members are recruited from randomly-selected landline and cell phone numbers across New Hampshire and surveys are sent periodically to panel members.

Granite State Poll Methodology

These findings are based on the latest Granite State Poll, conducted by the University of New Hampshire Survey Center. One thousand eight hundred and sixty-one (1,861) Granite State Panel members completed the survey online between February 18 and February 22, 2021. The margin of sampling error for the survey is +/- 2.3 percent. Included were 1,676 likely 2022 general election voters (MSE = +/- 2.4%). These MSE's have not been adjusted for design effect. The response rate for the February 2021 Granite State Poll is 33%. The design effect for the survey is 2.5%.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and to 2020 election results in New Hampshire.

The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Approximately 5,750 New Hampshire adults were recruited from randomly selected landline and cell phone numbers to participate in the panel. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%.
