

Spectrum Repack: Rescanning without A Remote

For the viewers who need to rescan, but they do not have a remote control for their TV, they can still manually scan for available channels.

The user must be able to access the **Menu** button on the TV, as well as the **Channel** arrow buttons and **Volume** buttons. These buttons are typically located on the side panel of the TV.

- Press the **Menu** button
- Using the **Channel** buttons scroll the pages up or down to find the **Tuner Mode**.
 - Look for **Antenna** or **TV**.
- Using the **(+) Volume**, button move right side of the menu page.
- Using **Channel** buttons move up or down the page to find **Auto Search** or **Auto Program**.
- Press **Enter/Source** button.

If the user doesn't have a manual for his/her TV, ask for the manufacturer and model number to look it up on the internet. Most manuals are available, but it could take a little bit of time to locate online.

FCC Call Center:

The center will be staffed from 8 a.m. to 1 a.m. ET and can be reached by calling 1-888-CALLFCC (1-888-225-5322) and pressing 6 to speak to someone on the help desk.
